For the University Avenue and

ARTWalk²

Enhancements Project

ARTWalk

The popular urban art trail is spearheading a collaborative project to collect and preserve personal Rochester histories, large and small. These stories will form an archive of possibilities for use by artists as they plan and execute public art projects over the next several years for the planned expansion of ARTWalk. The stories will also be an important resource for future historians, and for others as they seek to understand - and enjoy - that which makes Rochester... well, Rochester!

Your Rochester story can be unusual or offbeat; shared by many or totally unique. It can be a story of a public event, or a private experience, from long ago or the recent past. It can be a story about innovative ancestors, or of everyday life.

Rochester Stories archived at the Rochester Historical Society will be made permanently available for future generations.
